

Self-Locking Feed Front SV

Type SV = Self-Locking Feed Front with Variable Neck Width

The feed front with its special strength in the beef cattle and young stock range

Beef cattle:

- The tubing of each feed space is welded in three places (as shown below). High stability even for heavy beef cattle breeds.

Young cows:

- Small feed space widths are possible for optimum space utilisation due to construction

Features:

- Quiet locking with plastic-coated locking bolt
- Adjustable neck width
- Feed space individually lockable
- Feed front panel can be swung out up to 3.00 m (level installation)
- Angled installation possible

Technical advantages:

- High stability due to massive tubing
- Frame 2" (60 mm) x 2.9 mm, filler bars and yokes 1 ¼" (42 mm) x 2.6 mm
- Long life-cycle due to hot-dip galvanising inside and out
- Low-wear turning link

Safety/cow comfort:

- Safe for calves and collar-wearing animals due to optimised yoke bracket geometry
- Noise reduction due to large, sturdy rubber buffers

Security advice:

Fixation of the animals only under supervision

4 Advantages

Triple welded

Solid plastic-coated locking bolt

Heavy rubber buffers for maximum noise reduction

Noise reduction and deflector bracket (bottom)

Extension Sections

Telescoping Bracket	Standard	334408	1.4 kg
Telescoping Bracket	Standard Angled	334410	1.4 kg
Telescoping Bracket	Standard 2-Way	334409	2.3 kg
Telescoping Bracket	Compact 1-Way (wall mounting support tubes)	334406	1.6 kg
Telescoping Bracket	Compact 2-Way	334407	2.8 kg
Telescoping Bracket	Clamp 102 1-Way	334422	2.3 kg
Telescoping Bracket	Clamp 102 2-Way	334423	3.6 kg
Telescoping Bracket	Clamp 76 1-Way	334420	2.4 kg
Telescoping Bracket	Clamp 76 2-Way	334421	3.2 kg
Telescoping Bracket	with Eye Bolt	334411	2.2 kg

Self-Locking Feed Front SV

	Ref.	Frame length	Mounted length	Feed space width	Feeding place pitch	Weight
12/6 Young Stock	321035	572 cm	581 - 600 cm	50 cm	46.5 cm	214 kg
